

ARMS CYBER

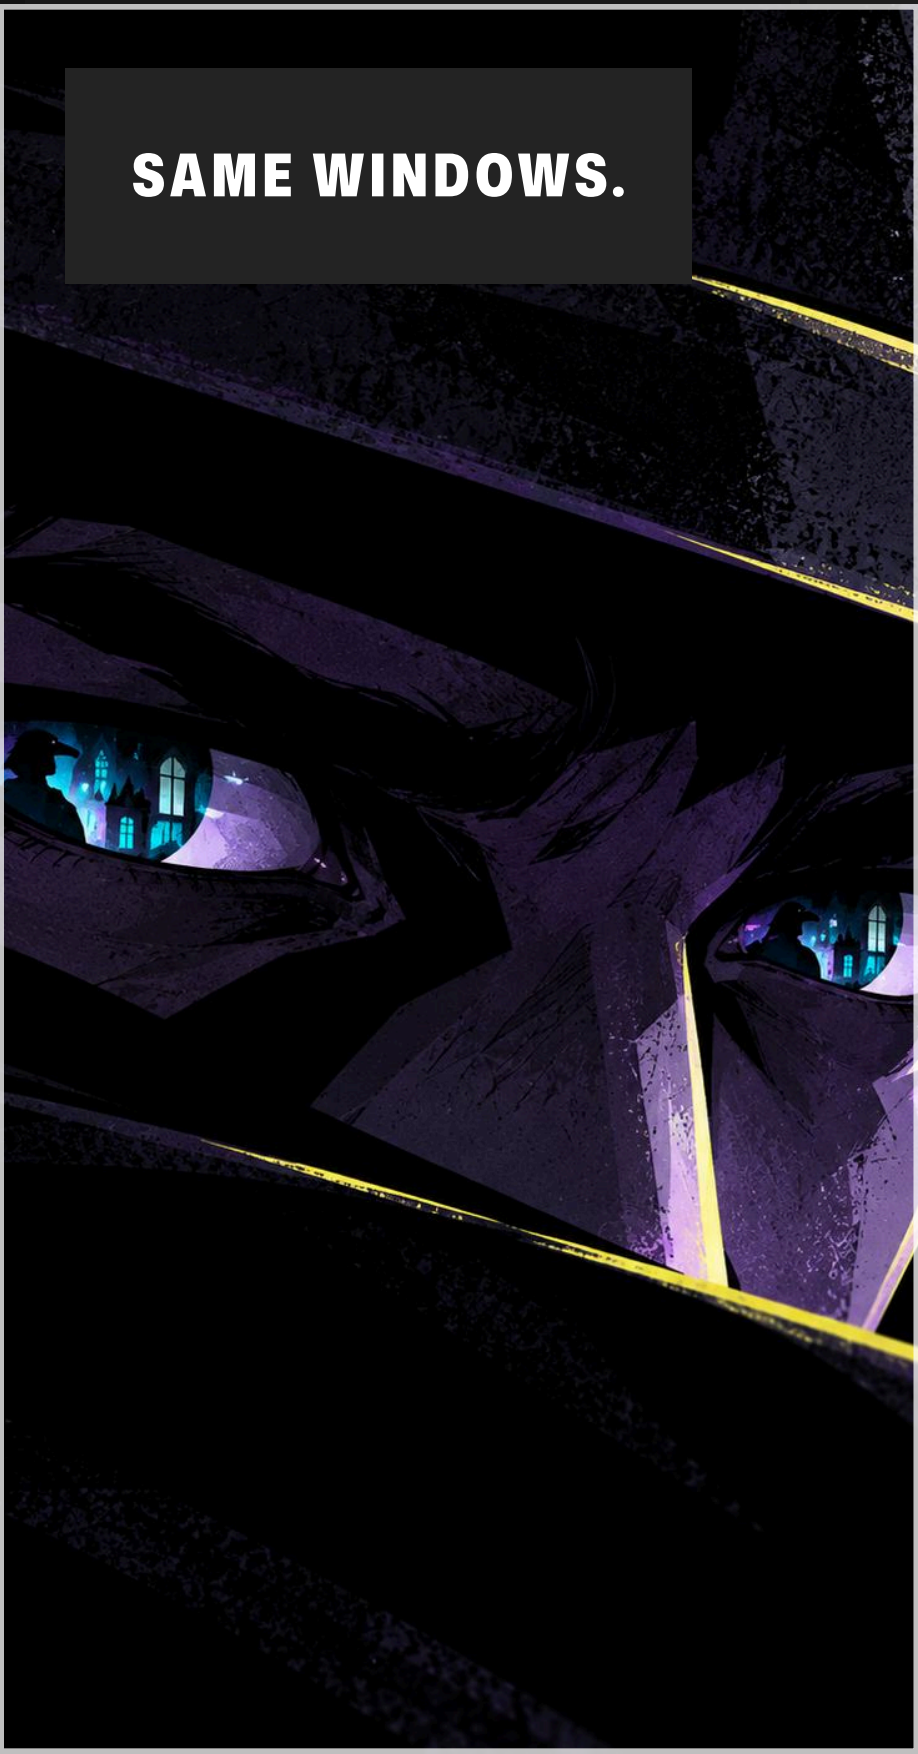

NOTHING TO FIND

AN ARMS CYBER **ENDPOINT DATA RESILIENCE** GRAPHIC NOVEL

HE'D CASED THIS BLOCK A HUNDRED TIMES.

EVERY HOUSE ON THE BLOCK WAS BUILT THE SAME WAY.

SAME WINDOWS.

SAME DOORS.

SAME LOCKS.

HE'D NEVER BEEN CAUGHT, BECAUSE HE LOOKED LIKE HE BELONGED HERE.

SMASH. GRAB. FOR FIFTEEN YEARS, THIS WAS THE BREAK-IN SECURITY WAS BUILT TO CATCH.

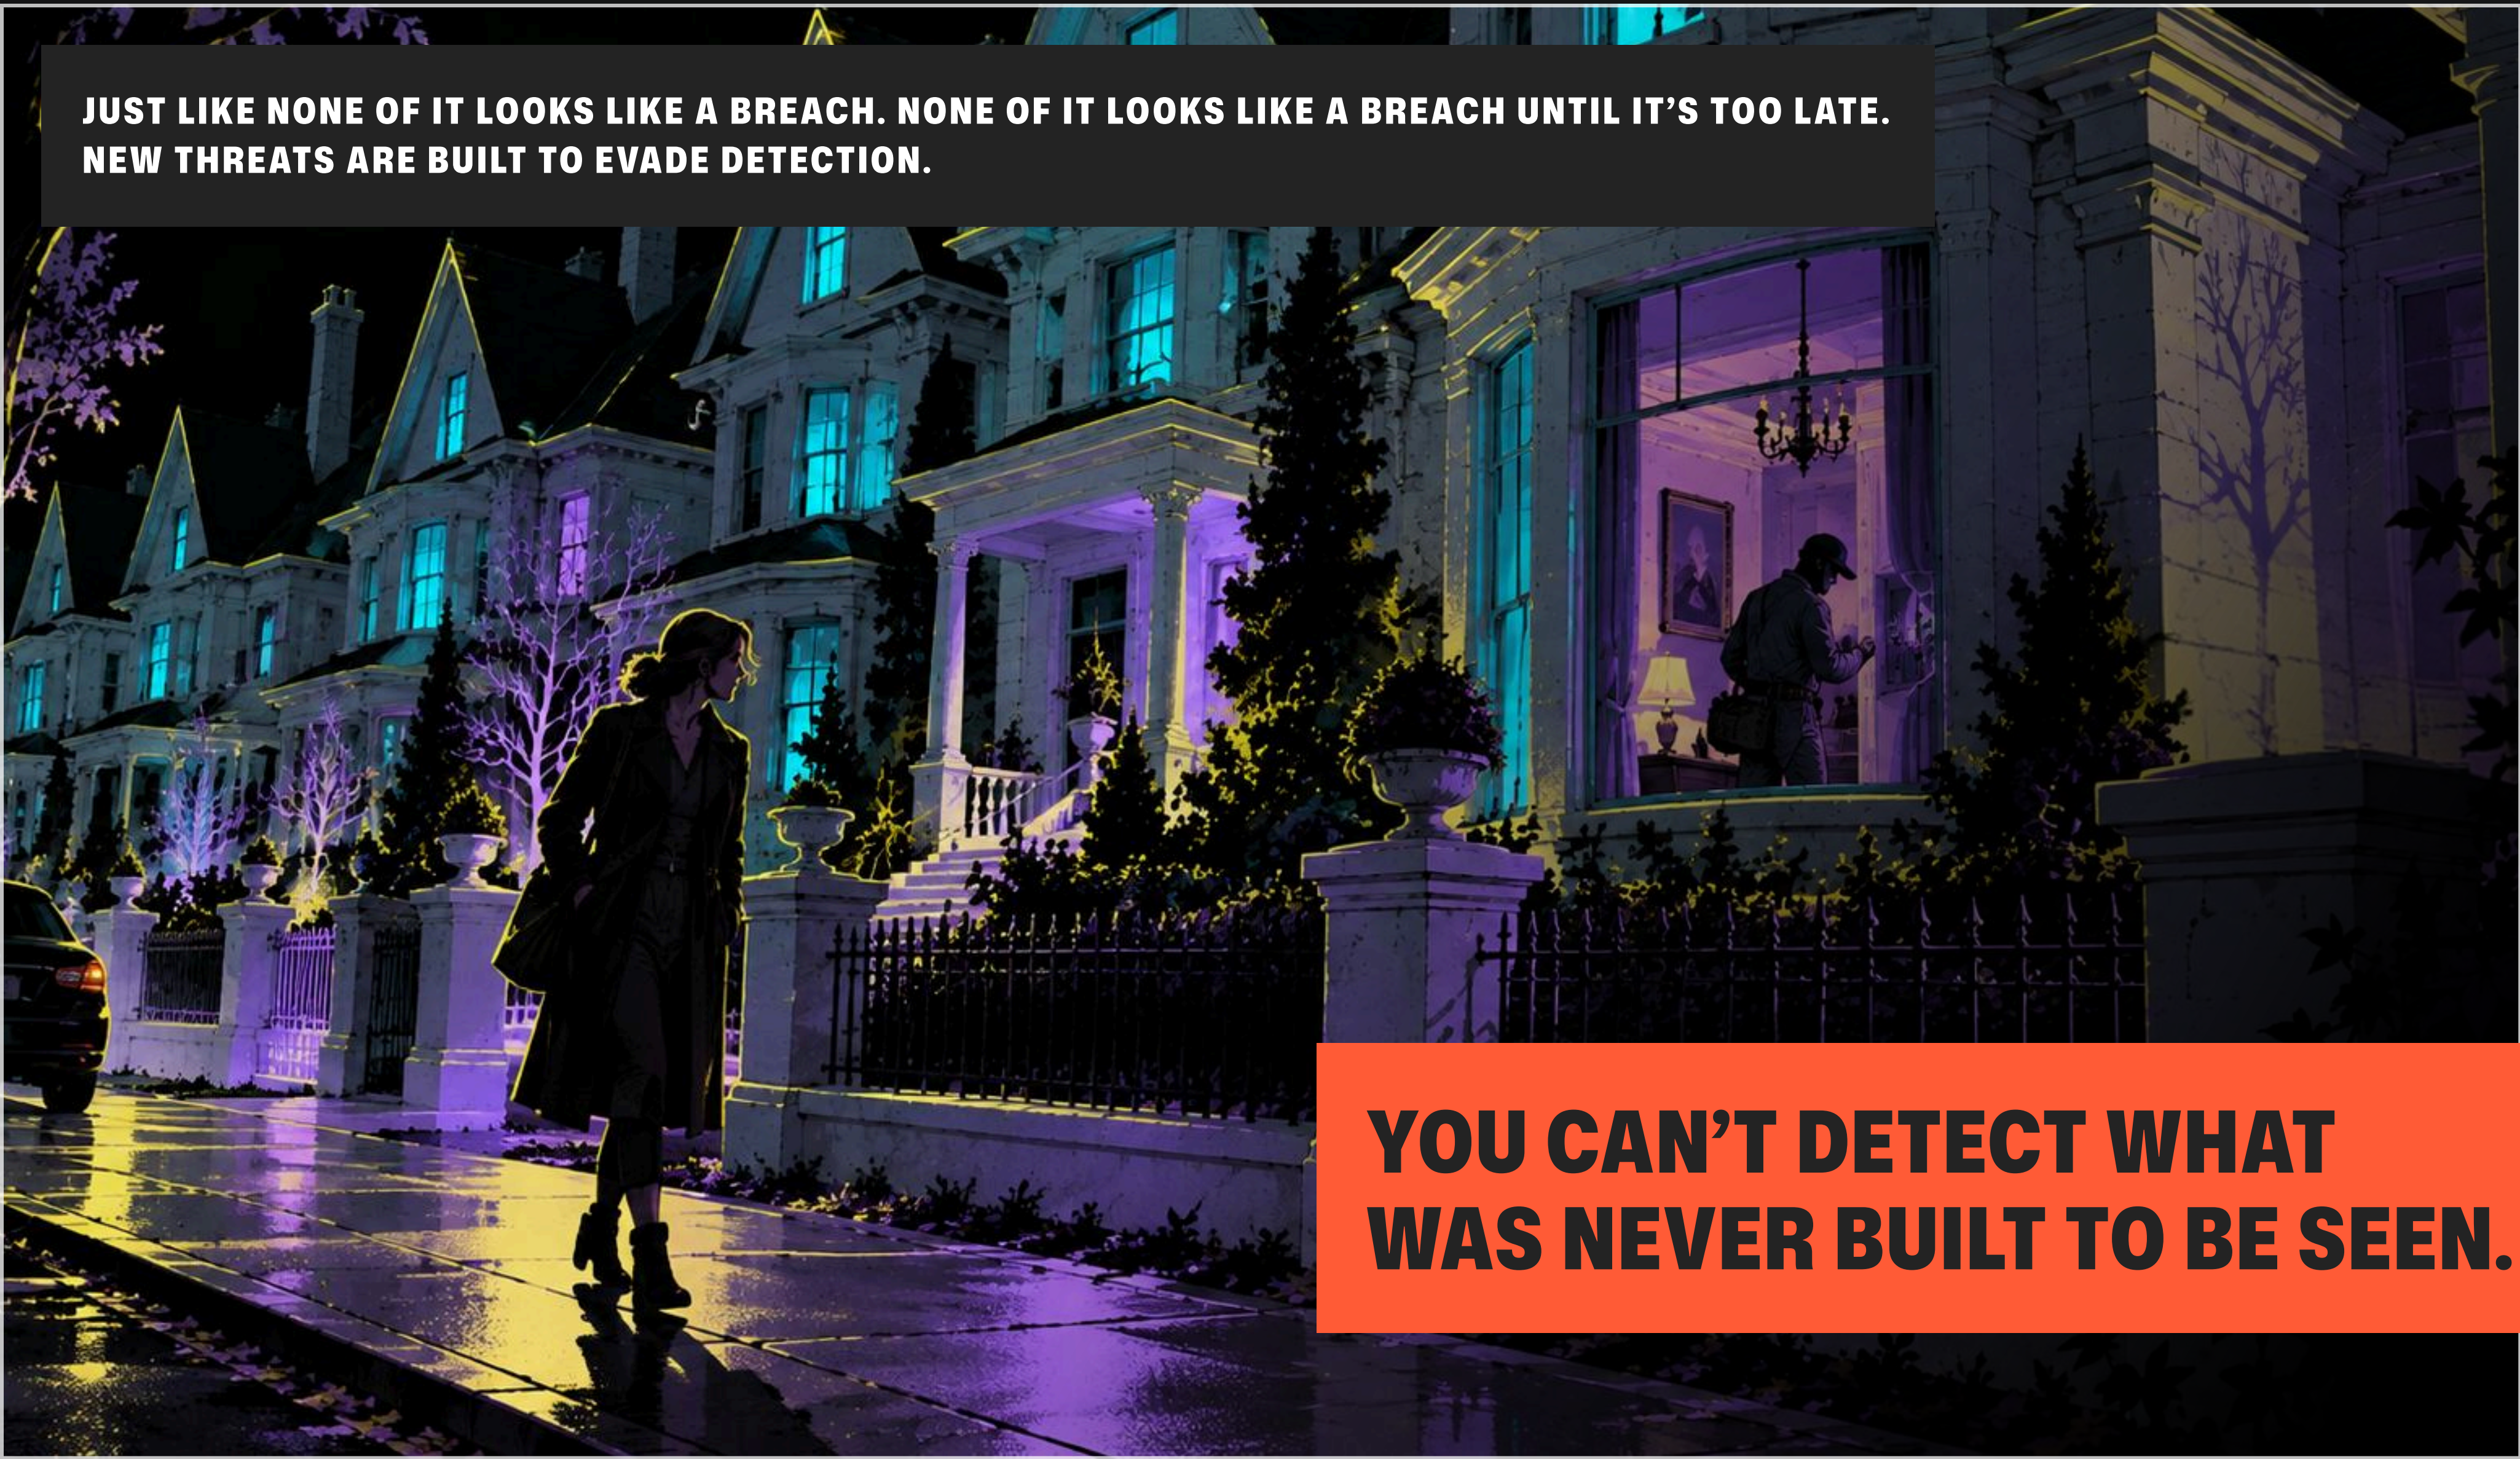

NOW, THE LOCKS HAVE GOTTEN SMARTER. BUT SO DID HE.

THE SAME THING IS HAPPENING ON NETWORKS.

79% OF INTRUSIONS NOW INVOLVE NO MALWARE AT ALL. THE FASTEST ATTACKER BREAKOUT ON RECORD IS 51 SECONDS.

(CROWDSTRIKE, 2025)

JUST LIKE NONE OF IT LOOKS LIKE A BREACH. NONE OF IT LOOKS LIKE A BREACH UNTIL IT'S TOO LATE. NEW THREATS ARE BUILT TO EVADE DETECTION.

YOU CAN'T DETECT WHAT WAS NEVER BUILT TO BE SEEN.

HE CAME BACK THAT NIGHT.

THE WINDOW HE'D PICKED WASN'T THERE.

THE DOOR LED SOMEWHERE ELSE.

EVERYTHING HAD MOVED.

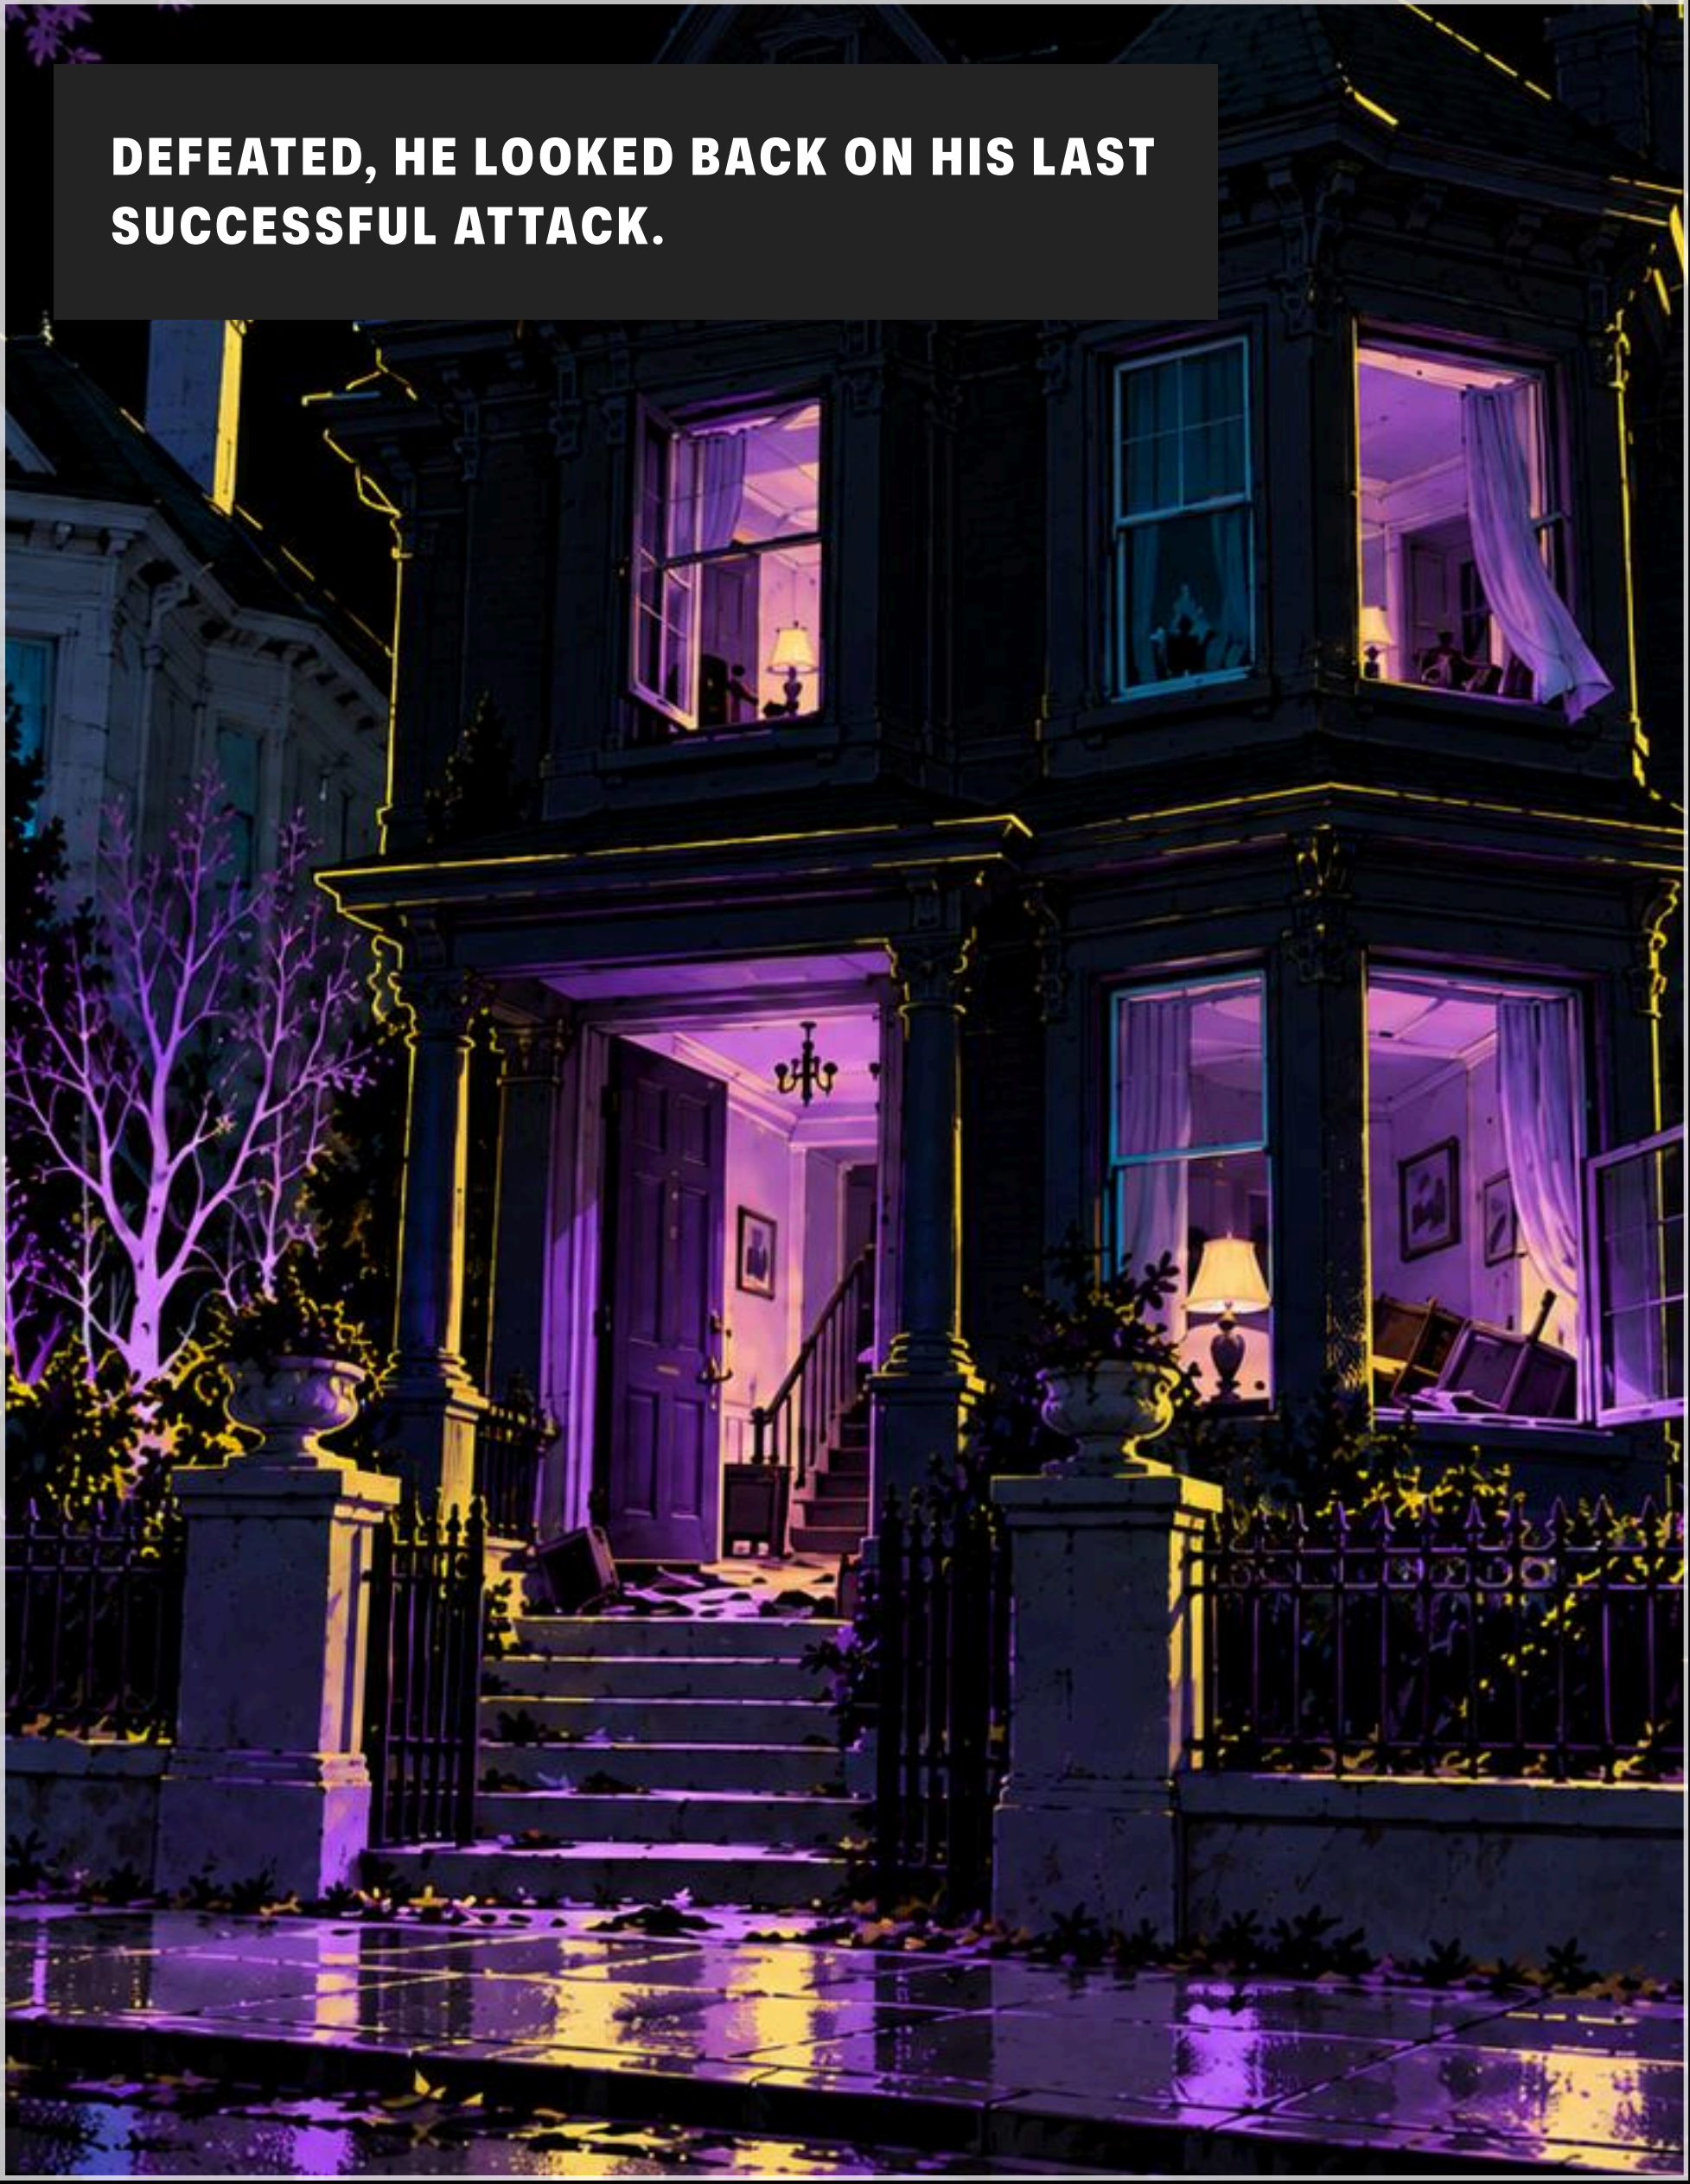

HE REMINDED HIMSELF THAT HE HAD FACED EVERY SECURITY SYSTEM. ALARMS. CAMERAS. SENSORS. FLOODLIGHTS

ALL ANY OF THEM DO IS TELL YOU THE BREAK-IN HAS ALREADY STARTED. HE'D ALWAYS BEEN LONG GONE BEFORE ANY ALARMS WENT OFF.

THERE WAS NOTHING HERE TO TAKE.

DATA THAT CAN'T BE FOUND CAN'T BE ENCRYPTED, EXFILTRATED, OR LEAKED.

THE FASTEST RESPONSE IS THE ONE YOU NEVER HAVE TO MAKE.

DEFEATED, HE LOOKED BACK ON HIS LAST SUCCESSFUL ATTACK.

THAT HOUSE HAD DONE EVERYTHING RIGHT. BUT HE KNEW HOW TO SLIP PAST ALL OF IT.

EVERY ROOM HAD WATCHED HIM WORK.

IT SAW HIM THE MOMENT HE OPENED THE SAFE.

THEN IT WATCHED HIM LEAVE.

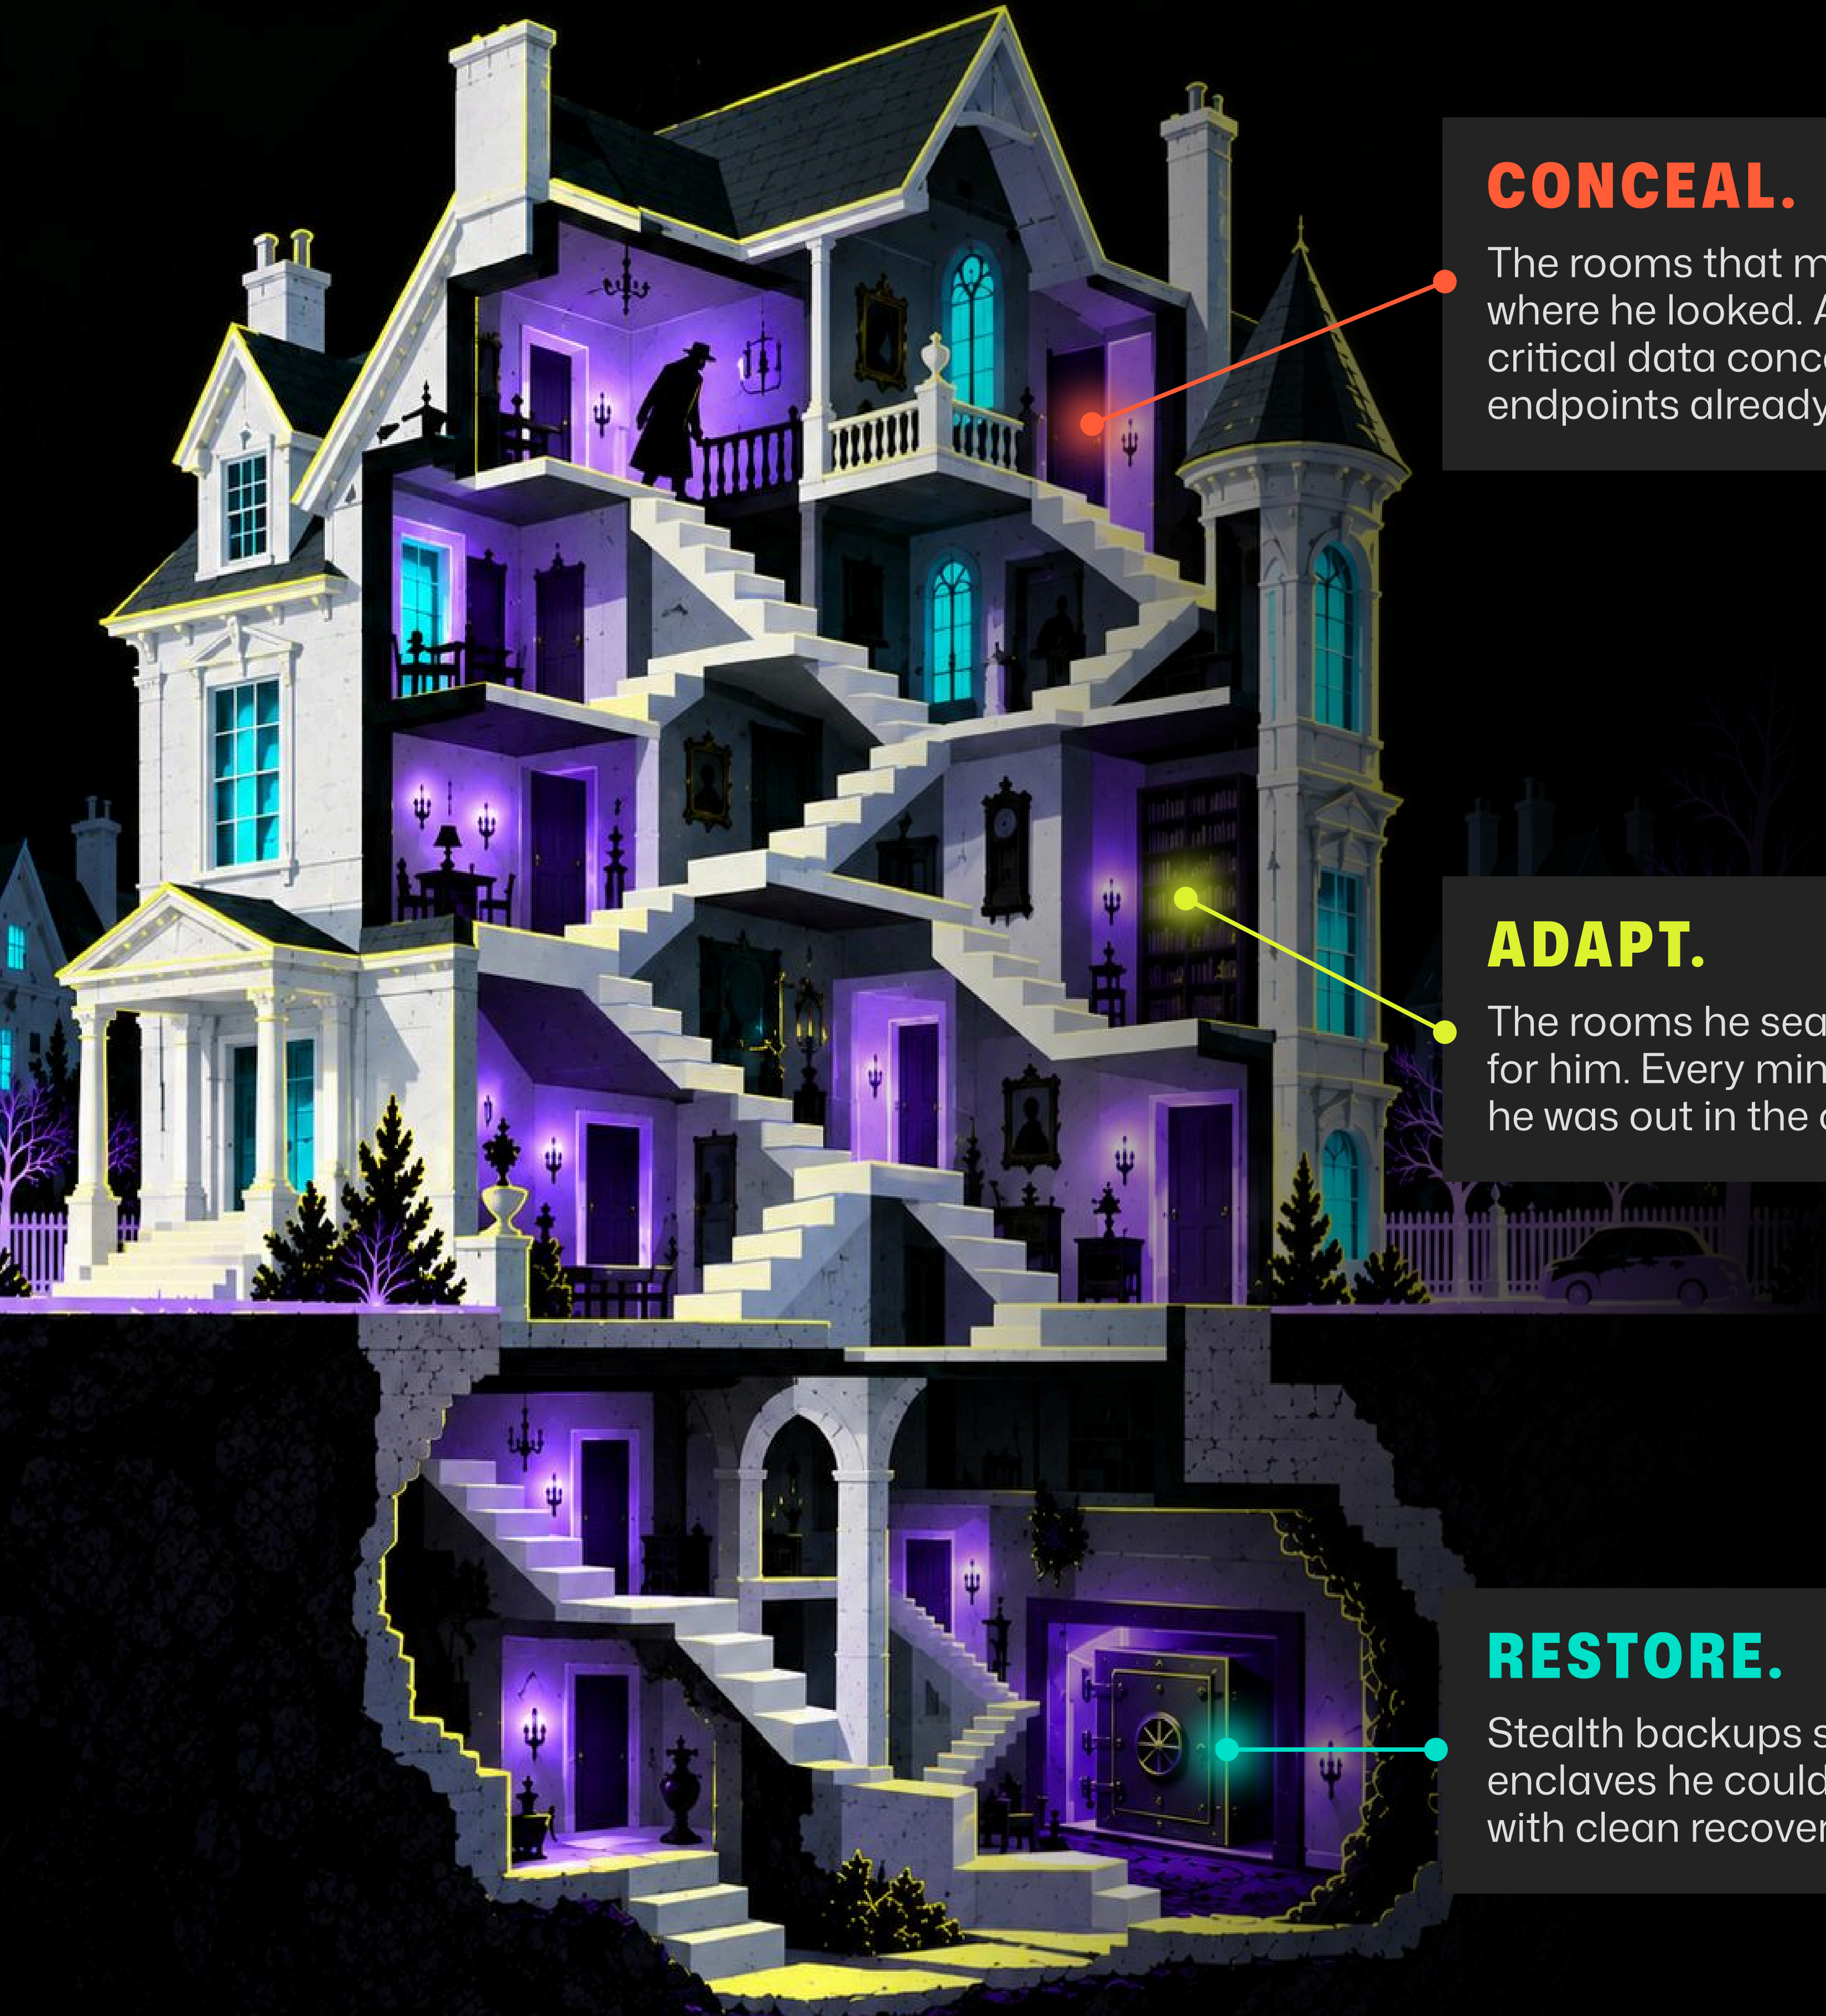

KNOWING ALL OF IT DID NOT SAVE THE HOUSE.

**EVERY SERIOUS CONTROL NOW WATCHES THE SAME WAY.
IT LABELS WHAT MATTERS, IT TRACKS WHERE IT GOES,
AND IT WARNS WHOEVER MOVES IT.**

THE HOUSE HE GAVE UP ON WAS NEVER EMPTY.

CONCEAL.

The rooms that mattered were never where he looked. Arms Cyber keeps critical data concealed on the endpoints already running.

ADAPT.

The rooms he searched were staged for him. Every minute he spent in them, he was out in the open.

RESTORE.

Stealth backups sit in concealed enclaves he couldn't find or corrupt, with clean recovery in minutes.

HE NEVER FOUND OUT WHY.

**DETECTION HAD ITS ERA.
THE NEXT ONE CAN'T BE FOUND.**

THE BURGLAR ON THIS STREET NEVER FORCES ANYTHING. HE DOESN'T HAVE TO.

Someone always hands him the key, and he's gone before anyone thinks to look. Tonight his target seems easy.

No alarm. No cameras. Nothing on it at all. But he won't be able to touch a thing.

Data an attacker can't find can't be encrypted, exfiltrated, or leaked. Arms Cyber takes the target off the board.

CONCEAL.

Critical data stays concealed on the endpoints you already run.

ADAPT.

Decoys draw an attacker away from real files, and Arms Cyber acts on the real files while encryption is happening.

RESTORE.

Stealth backups sit in concealed enclaves, with recovery in minutes.

It runs alongside the EDR and XDR you already have. No reboots. No rip-and-replace.

DETECTION HAD ITS ERA. THE NEXT ONE CAN'T BE FOUND.
